Introduction to Computers

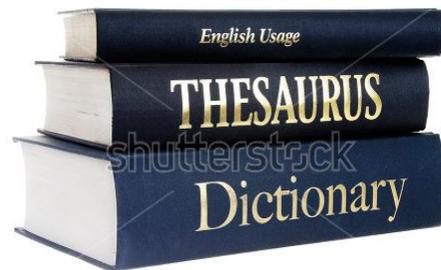

Our curriculum is designed to:

- Broaden employment related skills.
- Increase opportunities for employment or making career changes.
- Enhance the potential for succeeding at higher level educational institutions
- Encourage self-development

The on- line platform, used in a virtual environment giving students the opportunity to become more independent thinkers while attaining their realistic goals.

Our curriculum also includes occupational and career readiness.

Our intent is to provide a learning environment that encourages students to pursue their endeavors.

As instructors, our goal is to provide a quality educational service to those who are motivated to learn.
